

member::extractmemberproperties

```
graph LR; A[member::extractmemberproperties] --> B[prescribedcondition::existpi]; A --> C[prescribedcondition::getdistributedload];
```

The diagram illustrates a function call. A grey rectangular box on the left contains the text 'member::extractmemberproperties'. Two blue arrows originate from the right side of this box. The top arrow points to a white rectangular box containing 'prescribedcondition::existpi'. The bottom arrow points to another white rectangular box containing 'prescribedcondition::getdistributedload'.

prescribedcondition
::existpi

prescribedcondition
::getdistributedload
